

ARE YOU A BIOMEDICAL EDITOR?

If yes, you are invited to participate in an **academic survey** on **peer review**.

The objective of this survey is to investigate the perspectives of biomedical editors and authors on the **quality of peer-review reports**. We hope this work will help us to develop a new tool to assess the quality of a peer-review report in biomedical research.

The survey will take approximately **10 minutes** to complete and can be found at https://www.surveymonkey.com/r/REPORT_QUALITY_EDITORS

Participation in this study is completely **voluntary** and you may withdraw at any time. If you decide to participate, all your answers will be de-identified and stored in a secured repository at Universitat Politècnica de Catalunya, Barcelona-Tech (Spain).

You are also encouraged to **forward the link** of the survey to your colleagues who may be interested in participating in this study.

This study is part of the **Methods in Research on Research** (MiRoR) project, a joint doctoral training programme in the field of clinical research and which is funded by the European Union's Horizon 2020 Research and Innovation Programme under the Marie Skłodowska-Curie grant agreement No 676207 <http://miror-ejd.eu/>

Thanks in advance for your time and cooperation.

Cecilia Superchi, PhD Student at Universitat Politècnica de Catalunya & Université Paris Descartes

Darko Hren, PhD, Prof. at University of Split

José Antonio Gonzalez, PhD, Prof. at Universitat Politècnica de Catalunya

Isabelle Boutron, MD, PhD, Prof. at Université Paris Descartes
